Dear A-level Mathematics Student

We are writing to you to let you know of the revision materials we have to enable you to achieve your full potential in your upcoming GCE examinations.

The key to success in Mathematics is practise; therefore it is important that you begin your revision as early as possible. Your revision should include a combination of reviewing topics you have studied across Year 12 and 13 and exam-style questions.

The examination board has released advance information for your GCE examination. For each paper, the lists show the major focus of the content of the exams. The questions will be drawn from one or more of these areas of specification content and the information is presented in the order it appears in the specification and not in question order. This means that you need to revise a broad range of question styles to cover all levels of difficulty within a topic area. The advance information is also included in this pack.

Alongside the notes and examples you record in class, you have access to a number of useful resources, as detailed below.

- **Course Textbooks and Practice Books**
Completing as many questions of from these books as possible will enable you to see the range of ways questions could be asked within each topic area.
- **Pearson Online Revision Guides**
Through your ActiveLearn login, you can access free revision guides published by Pearson Edexcel to support you with your revision. You should already have a login but if you need help getting access see Mrs Shaw to set it up.
www.pearsonactivelearn.com/app/Home
- **Interactive Scheme of Work**
This is saved on the schools [worksheet drive](#) and includes links to videos and practice questions for each objective.
- **Exam Solutions**
www.examsolutions.net/a-level-maths/
This site includes some helpful video explanation of each of the objectives covered by the course.

**St George's Academy

- Physics and Maths Tutor
www.physicsandmathstutor.com/maths-revision/a-level-edexcel/
This website includes some helpful revision cheat sheets and questions by topics with markschemes.
- Naiker Maths
www.Naikermaths.com
This includes a range of exam style questions for both pure and applied and is grouped by topic.
- Dr Frost Maths
DrFrostMaths.com
This website includes presentations for each chapter of the textbook, practice questions and videos.

This is just a selection of some of the most useful resources you have available, and should help to provide you with a bank of tools to support your revision.

Good luck and happy revising!

Yours sincerely

The Mathematics Department
