

CAA/NOCN Diploma Level 2 Site Carpentry

The Level 2 Diploma in Site Carpentry is a one-year course designed to develop the skills and knowledge of people, enabling them to work in the industry in their chosen craft. It has been specifically developed for delivery in a training environment using simulated conditions, and the test(s) are based on the learner showing what they can do as an individual through the completion of all the requirements of the qualification.

The Qualification comprises:

- general core units
- occupation specific units
- synoptic practical assignment
- multiple choice unit end tests
- online testing of knowledge.

All the units of training must be completed by each learner. ALL outcomes must be achieved during the training programme. To gain the diploma, learners must achieve all units, the synoptic practical assignment and multiple choice unit tests. They must also pass the Evolve online test. Another important feature of the qualification is that it provides a progression route towards achieving a National Vocational Qualification (NVQ).

COURSE CONTENT

This course consists of 8 compulsory units separated into knowledge and skills.

The units are as follows:

L1Core01: safe working practices in construction

L2Core04: knowledge or information, quantities and communicating with others
